MICROBIAL CONTROLS

Total Plate Count	Negative
Coliforms	Negative
E. coli	Negative
Staphylococcus aureus	Negative
Mold/Yeast	Negative
Salmonella sp.	Negative
Listeria sp.	Negative

Note: Less than (<) sign indicates Negative growth for those bacteria at the lowest level expressed. For example, <10 cts per gram would indicate Negative, or no growth, for the bacteria at a concentration of 1:10; if the bacteria is present it is less than this concentration.

Based upon the Microbiological results of the sample listed above and insofar as the analyses performed were able to assay for the presence or absence of specific pathogens, the sample analyzed would appear to be **wholesome and fit for human consumption** under refrigerated conditions for approximately sixty one (61) days.
